CUMULATIVE EDITORIAL INDEX

Including January 1964 through June 1964. Number preceding hyphen is month of issue; those following are page numbers.
AUTOMATION *is indexed in the Applied Science & Technology Index and the Engineering Index, available in libraries generally. Microfilm copies are available from University Microfilm, 313 N. First St., Ann Arbor, Mich.*

A

Actuation system, 3-43
Adams, J. J.
Seven Challenges to Management, 6-54
Adhesive, pressure activated, 6-20*
Adhesives, for stamped parts, 6-16*
Analysis, inspection data, 5-37
Arnstein, G. E.
A Growing Picture of Education, 4-56
Assembling gravity conveyor rollers, prob., 6-4*
small parts, prob., 5-4*
Assembly, 6-76
bicycle pedals, 1-59
door hinge, 2-37
ferrules into nuts, 1-59
German automobiles, 2-69
metal sandwich units, 5-64
seals on universal joints, 1-59
of shoes, 6-15*
Automate, historical word usage, 4-133
Automatic controls, trends in, 4-14
Automation,
as adaptive process, 4-30
of assembly, 1-59
of cement making process, 1-40
the challenge to the nation, 4-72
and education, 4-56
and employment, 4-30
and employment statistics, 4-48
evolving management systems, 6-37*
and industrial robots, 6-62
forces involved, 4-14
and labor, 4-84, 6-54
German auto manufacture, 2-69; 5-43*
government investigation, 4-116
historical development of, 4-30
history, immobility of labor, 4-44
importance of mobility, 4-174
in small bakeries, 2-43*
job generators, 4-80
legislation affecting, 4-116
and maintenance, 6-69
and management, 6-54
National Commission on Automation and Technological Progress, 6-9*
philosophy, 4-14; 5-48
production systems, 2-48
and railroad industry, 6-26*
and research and development, 4-64
through innovation, 4-30
and worker displacement, 4-30

B

Bakery automation, 2-43*
Balancing, engine, 5-43*
Ball bearing screws, 1-65
ball screws, 1-49
Bargaining, computer study, 6-19*
Barta, H. E. P.
Evaporation System Recovers Plating Solutions, 5-54
Batching, remote control, 1-15*
Beacham, R. C.
Focus On Automatic Assembly, 6-76
Beaumont, R. A.
Automation and People, 4-158
Beirne, J. A.
Labor Views Automation, 4-84
Bernhard, R. D.
Providing Timely Production Data, 3-48
Blending,
batch, 3-5, 6-86*
coal, 1-40
Bobbin, J. E.
Applying Ultrasonics to Inspection, 1-110
Bolz, R. W.
Automation Outlook, 6-11*
Named Editor-in-Chief, AUTOMATION, 1-18*
Automation and the American Consumer, 4-14
Bonding compound, 2-26*
Broaching, continuous, 2-37
Brown, K. J.
Labor Views Automation, 4-84
Brozen, Y.
Putting Economics and Automation in Perspective, 4-30
Building block, production systems, 2-48
Bush, D. E.
Digital Positioning Controls, 5-76
Bushnell, D. S.
Educate to Avoid Obsolescence, 4-264*

Business failures, 4-134
Business, and the individual, 6-157*
Butler, E. A., Jr.
Splicing Webs for Continuous Production, 2-61

C

Cases, sealing random sizes, 1-68
Casting, aluminum mats, 5-64
Centering, automatic machine, 5-80
Central control, information, 3-35
Circuit,
breaker tester, 1-56
techniques, 6-157*
Circuitry, printed & integrated, 6-157*
Clague, W.
What Employment Statistics Show, 4-48
Clutch drives, electromagnetic, 3-56
Coal, loading facility, 1-40
Coal mining, 4-96
Coating, paperboard, 3-85
Communications, seminars for, 6-16*
Computer,
controls operation of rolling mill, 6-59
inventory simulation, 1-65
Computers,
control of cement processes, 1-69
for direct digital control, 6-12*
process control, 3-81
in quality control, 5-62
quality control use, 5-37
Computer control, of continuous digester, 1-82
Congress, studies National Commission on Automation, 6-9*
Consumption expenditures, 4-14
Continuous pulp digester, is computer controlled, 1-82
Control,
assembly machine, 6-76
continuous level, 3-14*
delay technique for processes, 6-16*
infrared oven, 2-37
process computer justification, 3-81
Controller, ultrasonic, 3-14*
Controlling,
an ingot casting wheel, prob., 1-4*
moisture, prob., 6-4*
Controls,
adjustable frequency inverter, 3-66
automatic, 6-155*
cement plant, 1-69
cut-to-length line, 5-76
digital, 5-76
digital readout of analog instruments, 1-55
inventory, 1-65
mechanical memory dispatch, 1-64
pneumatic, 1-59
servo, 1-65
small computer for, 6-12*
statistical quality, 5-62
tension, 1-65
Conveyors, magnetic, 3-72
Counting,
controls cut-to-length, 5-76
steel bars, prob., 3-4*
wires in belts, prob., 2-4*
Coupling, flexible design, 6-19*
Cupps, W. D.
Tester Improves Breaker Quality, 1-56
Cutting and threading conduit, prob., 6-4*
Cutoff, extrusion, 5-70

D

Data, regulating export of, 6-12*
Data collection, 5-37
Data collection, for efficient manufacturing control, 1-43
Data input, digital readout of analog instruments, 1-55
Data processing,
automatic, 1-122*
company's information system, 3-48
computer, 5-13*
making computer memories, 2-26*
and management science, 4-134
reports to government, 6-11*
retrieval system, 6-27*
Day, V. B.
Employee Security Is A Local Issue, 4-150
Dees, C. R.
Computerized Maintenance Scheduling, 1-22*
Defense-space industries, future of, 6-10*
Dennard, E. J., Jr.
Generating Charts for Quality Control, 5-62
Designing, products for assembly, 6-76
Detecting metal objects, prob., 1-4*
Digital computers, technology and design, 2-148*; 5-138*
Direct digital control, 6-12*
Dispatching system, tow cart, 3-80
Drive mechanisms, ball screw, 1-49
Drives for intermittent feed lead screws, prob., 2-4*
Drives,
cam-controlled hydraulic, 3-43*
conveyor, 1-20*
multiactuator, 3-43*

E

Economic justification, process control computers, 3-81
Economic observations, accuracy of, 1-122*
Economic outlook, automotive, 1-27
Economics,
assembly machine, 6-149*
and education, 4-56
of foreign investments, 1-30
of production systems, 2-48
related to social forces, 4-79
Economics of, industrial robots, 6-62
Education,
and automation, 4-56
future needs of, 6-28*
off-campus graduate program, 6-30*
of engineers, 6-30*
Electric insulation, method of application, 3-64
Electrical,
code, 5-138*
current, new technique for generating, 6-21*
discharge machining, 3-14*
Electrocoating, auto bodies, 6-15*
Electrohydraulic servomechanisms, 1-22*
Electromagnetic clutch drives, application of, 3-56
Electromechanical transducers, 2-16*
Electronic,
logic machines, 5-138*
measurements, 6-155*
switch, 3-13*
Employment,
and automation, 4-14
distribution of blue-collar workers, 4-174
distribution of white-collar workers, 4-174
growth in manufacturing, 4-30
and productivity, 4-48, 6-62
rates of change in states, 4-174
and technology, 4-48
trends, 4-48
Engelberger, J. F.
Role of Industrial Robots, 6-62
Engineering,
for ease of maintenance, 6-69
mathematics, 2-148*
personnel aspects, 1-34
production systems, 2-48; 5-48
Eppert, R. R.
Automation and Corporate Efficiency, 4-134
Evans, L. H.
A Growing Picture of Education, 4-56
Extrusion, underwater, 5-70

F

Facility remodeling, 1-27
Feeder,
industrial robot, 6-62
vertical screw, 3-19*
Feeding,
pistons, 5-80
presses, prob., 5-4*
webs, 2-61
Finishing grinding wheels, 5-57
Finishing steel sheets, 2-37
Fixtures, welding German autos, 2-69
Flame process, titanium dioxide, 2-57
Fleischauer, P. J.
Handling Cylindrical Products, 3-67
Fluid logic, study aid, 6-20*
Fox, E. C.
Computer Control Continuous Digester, 2-82
Frequency inverters, 3-66

G

Gaging, post-process, 5-43*
Gallahue, W.
Pneumatic System Controls Web Tension, 5-71
Gang punch, 2-26*
Geurts, A.
Indicator/Controller Programs High-Vacuum Cycle, 6-88
Goldwater, B.
Automation In The Political View, 4-72
Gorringe, J. N.
Men and Machines Can Mean Better Jobs, 4-144
Graphical symbol standards, 5-138*
Gravity, handling of cylinders, 3-67
Greasing bakery pans, 1-75
Grummon, Mrs. R. M.
A Parent Tangles With Automation, 4-259*
